R8 4.2 & 5.2	7/17/09	Option 7M9 is no longer available

A WORD ABOUT LOW ASPECT RATIO AND HIGH PERFORMANCE TIRES

Performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under these circumstances, you should equip your vehicle with four all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended all-season tires specified for your car, or their equivalent. These high-performance tires have a lower aspect ratio that aids performance and handling; however, in order to avoid rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. **Serious wheel and tire damage may occur if vehicle is operated on rough or damaged road surfaces or upon encountering debris or obstacles.** Please also remember in making your selection that, while they deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices.

For more information on all of these topics, please consult the owner's manual, your dealer, or call 1-800-FOR-AUDI.

Audi of America believes the information and specifications supplied in this ordering to be correct at the time of publishing. However, specifications, standard equipment are subject to change without notice. For the latest information about standard equipment always refer to the vehicle specification page on AccessAudi.com
